

ABSTRACT

The Central Statistics Agency of Tasikmalaya Regency is a state-owned enterprise engaged in statistics. So the Tasikmalaya Regency Central Bureau of Statistics produces data from censuses or surveys from departments or other government institutions to produce statistical data needed by the government and society. The fixed assets owned by BPS in Tasikmalaya Regency consist of motorized vehicles, computer fingerprint attendance devices and chairs and bookshelves where books are placed to be read in the BPS district of Tasikmalaya. The employee in the part of registering fixed assets has used the application on the registrar. Web-based applications built using the waterfall method and using PHP programs and framework code igniters. The functionality of this application is to record asset repairs, asset maintenance and asset card reports, then reports on repairs and maintenance of fixed assets.
