

ABSTRACT

At the beginning of the emergence of the Covid-19 pandemic in China in 2019, a lot of news spread about this virus. With the development of technology, various information can be disseminated quickly through social media so that people can easily receive information about Covid-19. But because of the large number of social media, not a few hoax news about Covid-19 that spread to the public. This can affect many people so they don't take it seriously and even don't believe in the existence of Covid-19 and eventually they don't comply with health protocols. As a result, cases and the spread of Covid-19 in the community has also accelerated. The purpose of this study is to provide education about the Covid-19 hoax news to teenagers and how we can avoid these hoax news. The research method used in this study is a qualitative method, and the data collection method used is observation, literature study and interviews. The final result of the work design process is in the form of motion graphic animation media which is expected to provide information and education about Covid-19 hoax news to teenagers.

Keywords: motion graphic, hoax news, Covid-19, teenagers
