

LIST OF FIGURES

Figure 2. 1 The concept of a radar system in detecting.....	6
Figure 2. 2 Block diagram of the CW Radar system.	8
Figure 2. 3 Block diagram of multi-frequency CW radar.	25
Figure 2. 4 Time-Frequency diagrams of several radar signals.	14
Figure 2. 5 Comparison of signals from several radar systems in time and frequency domains.	15
Figure 2. 6 MFCW radar signal.	16
Figure 3. 1 Experimental setup using computer simulation.....	24
Figure 3. 2 The basic principles of radar modeling using VNA.	27
Figure 3. 3 Experimental design using VNA devices perangkat.	28
Figure 3. 4 Experimental design using SDR devices perangkat.	29
Figure 3. 5 Block diagram GNU radio.....	29
Figure 4. 1 MFCW signal for N and Δ at 5 and 200 KHz.....	31
Figure 4. 2 MFCW signal with several different frequency ranges at the same (N =5).....	32
Figure 4. 3 MFCW signal output with two different Δ	33
Figure 4. 4 Radar system with 200 MHz bandwidth at 2 GHz frequency. (a) Comparison of FMCW, MFCW and SFCW radar systems with N of 5. (b) Comparison of FMCW, MFCW and SFCW radar systems with N of 6.....	34
Figure 4. 5 MFCW radar signal with Δ 200 of 200 KHz and a bandwidth of 2000 KHz. (a) the beam signal from the MFCW radar. (b) Signal received by the MFCW radar for targets at a distance of 100 m. (c) Signal received by MFCW radar for targets at a distance of 300 m. 36	
Figure 4. 6 Received signal affected by the noise amplitude with an SNR of 10 dB.	37
Figure 4. 7 Received signal affected by phase noise with a variance value of 0.2 rad ²	37
Figure 4. 8 Normalized Cross correlation result for three different target distances.	38
Figure 4. 9 Normalized cross-correlation results for distances of 25 m, 50 m, and 100 m....	39
Figure 4. 10 Cross-correlation results in detecting distances under the influence at 5 dB SNR.	39
Figure 4. 11 Cross-correlation results in detecting distances under the influence of phase noise of 0.2 rad ²	40

Figure 4. 12 Phase detection output in detecting for several different small displacement values.	41
Figure 4. 13 Phase detector output in detecting several small displacement values at 5 dB SNR.	41
Figure 4. 14 Phase detector output in detecting several small displacement values at 10 dB SNR.	42
Figure 4. 15 Phase detector output for three different small displacement values at the phase noise of 0.2 rad ²	42
Figure 4. 16 Performance of the proposed radar system in detecting the target distance under the influence of noise.	44
Figure 4. 17 Performance of the proposed radar system in detecting the magnitude of the small displacement which is affected by noise.	45
Figure 4. 18 Measurement Using SDR Device.	46
Figure 4. 19 Target-I breathing pattern.	47
Figure 4. 20 Target-II Respiratory Pattern.	47
Figure 4. 21 Multi-frequency signals emitted and received by the MFCW radar system.	48
Figure 4. 22 Cross correlation results from the MFCW radar system during loop back mode and detection mode.	49
