

ABSTRACT

Dermatologist Consultation Application, is a technological development in the medical world. This application is a concept of developing, implementing, and implementing technology that can be applied to skin specialist clinics, which can help a form of interaction between doctors and patients. Therefore, a clinic can be said to be smart if the clinic has applied a technology to one of the aspects in that field. This technology will be in the form of a web-based application. The application to be built is a web-based application that uses PHP, HTML, CSS as programming languages and MySQL for databases. For system development using the MVC model, and the manufacture is given a time limit. With the completion of the dermatologist consultation service application, it can help people who want to consult using the web-based application.

Key word: Website, consultation, dermatologist.
