

ABSTRACT

Clothing Corporation is a trading company engaged in Fashion Distro. The Clothing Corporation company sells various kinds of fashion items including t-shirts, jackets, pants, and many other fashion items. The way to sell at this company is through online orders such as whatsapp, instagram, and many others. Uncontrolled inventory makes it difficult to know when the company should buy raw materials again. Raw Material Purchasing and Management Application Using the First In First Out (FIFO) Perpetual method contains functionalities including managing capital deposits, managing raw material purchases, managing raw material receipts, and presenting financial reports that can produce journals, ledgers, purchase reports, receiving reports . Functionality tested using the Blackbox Testing method.

Keywords: Purchasing, Inventory, FIFO, Blackbox Testing
