Recreation is an activity that is intentionally carried out for the pleasure / satisfaction of the perpetrator. Currently, a new virus has emerged throughout the world, namely Covid-19. Where governments around the world, especially Indonesia, carry out a lockdown and are forced to temporarily close tourist attractions. The implementation of the Lockdown in Indonesia resulted in a decline in the Indonesian economy by up to -5.23%, because the tourism sector is one of the largest contributors to the country's foreign exchange. Indonesia enforces the New Normal Era where people can continue to vacation by complying with existing health protocols. With the enactment of the New Normal Era, a new holiday style has emerged in the community, such as a staycation. not infrequently people choose to stay at hotels during a staycation, this doesn't seem to have much impact, but psychologically it helps some people recover from boredom, especially families. The purpose of this design is to be able to provide facilities that can support family activities during a staycation at the Family Hotel and implement health protocols so that visitors feel safe when doing a staycation at the hotel.
