

ABSTRACTS

Creativity is a talent that is owned and carried from birth by everyone. From an early age, without realizing it, every individual has been taught about creativity, both in the family environment and when entering the level where they get education, namely school. In learning at school, there is a lesson called cultural arts, in which various kinds of art will be taught and one of them is fine art. The activities carried out in this learning can help to develop creativity.

The purpose of this study was to analyze the creativity and creative process of students at SMA Negeri 1 Kadipaten after learning cultural arts, especially fine arts, and to find out the students' interest in the fine arts department.

To achieve what is expected in this study, data collection was carried out using a survey method for students of SMA Negeri 1 Kadipaten which became the main data and book literacy as supporting data. After the data is collected, the data will be analyzed by descriptive analysis method.
