# ABSTRACT

Atta Gita Nelsa, 1603154185, 2022. *Redesain Interior Perpustakaan Universitas Islam Bandung.* Proposal Tugas Akhir : Interior Design Creative Industry Faculty of Telkom Uuniversity.

University Library Is a technical implementing unit (UPT) which together with other units participate in implementing the Tridharma of Higher Education. This Tridharma is translated into daily activities through collecting, selecting, processing, caring for and serving information to the parent institution in particular and the poor in general. The Unisba Library as a university library is one of the supporting elements in the Bandung Islamic University. Supporting elements are complementary in the fields of education, research and community service outside the faculties, laboratory and studio departments. As a supporting element at the Islamic University of Bandung, the UPT Library helps implement the Tridharma of Higher Education and tries to help the realization of mujahid (fighters), Mujtahid (Researchers) and Mujaddid (Renewers) (3M) in an Islamic scientific society in order to achieve national education goals. In this research of the Unisba Library UPT, there are several facilities that do not meet the requirements contained in the National Library Standards, where activities for users are notfulfilled due to the lack of needs for each library user, and several other supporting factors that do not yet exist in the library, so efficiency and the application of the needs of students in visiting the library which is intended according to the supporting elements in the vision and mission of the Unisba Library. There are no characteristics in the Unisba library so that the realization of the vision and mission cannot be implemented, in this redesign it can make the Unisba Library better, and have sufficient functionality and a special attraction for students and the general public who want to visit the library.
