

## ABSTRACT

### ***Redesign of the West Sumatra Provincial Financial Agency with an Activity Approach***

*The government office is a state-owned building that has a function as a forum for regional government administration activities, where people's representatives regulate the course of government and development in all sectors of life to improve people's welfare. Government work which has the main task of implementing the management of Regional Finance. With the many tasks of the Regional Finance Board carried out by the Province of West Sumatra, the productivity of employees must be increased in order to remain effective and innovative in formulating work programs and work activities. The stages of data collection were carried out by collecting data through interviews, observations and field studies. With these problems, it is necessary to redesign the interior of the Regional Finance Agency office of West Sumatra Province in order to support activities and also user comfort by applying in accordance with government office standards by applying an Activity Approach related to space users described from tasks and behaviors so as to realize the design. that maximizes the function of space and the appropriate inter-space organization*
