

ABSTACT

The road bridge and tunnel hall is an organization related to the construction of bridges and tunnels in Indonesia. The Bridge and Road Tunnel Hall has various activities, for its main activities, namely carrying out administrative, administrative, data collection and information activities, monitoring and evaluating road bridges and tunnels, receiving general/VIP guests, conducting large/small meetings. However, to support these various activities, the bridge and road tunnel halls are still not optimal to the ideal standard for several aspects that can cause inconvenience for users in various activities and the facilities for several supporting activities are still not available. In order to support the Bridge and Road Tunnel Hall to function properly, ideally it should be supported by the need for facilities and infrastructure in accordance with the Regulation of the Minister of Public Works no. 30/PRT/M/2006 regarding technical guidelines for facilities and accessibility in buildings and the environment and for other standards covering bridge halls and road tunnels. Based on the results of observations and field studies, bridge halls and road tunnels are still not optimal in supporting various activities and there are no adequate supporting facilities.
