ABSTRACT

Lake Toba is a tourist asset located in the province of North Sumatra.In its development, transportation on Lake Toba is now using ships for public transport and freight transport. Therefore, the people of generally have to buy a ticket in advance to board the ship. Purchase of boat tickets at the port causes some difficulties, namely that people must come to the location ticket sales at the port. Information about tickets at the port is very incomplete so that the information about tickets obtained is less than optimal and efficient.

In this final project to build and design a website-based application that useful for buying tickets online. With this website-based application, make it easier for the public to make ticket purchases with accurate information displayed in full and in detail.

Final Project "Application for Ordering Boat Tickets in the Lake Toba Area Based on" Website" is built using HTML and PHP to create a website appearance and MySQL which is useful as a database to store information about tickets and tickets display it on a web page. This website-based application is adapted to the needs of the public so that in the delivery of information and ticket sales online can make it easier for people to buy tickets.

Keywords: Online ticketing, community, ticket purchase, website.
