

ABSTRACT

PT. Tourezia Cakra Inspira is a service company engaged in tour and travel. Tourezia has product sales services, one of which is the Tour Organizer. The types of sales are in the Form of Regular and Incentive Tour Packages. PT Tourezia has implemented web-based sales, but has not implemented planning and recording tour cost in the fields of accounting inFormation systems. The purpose of this application is to make it easier for Tourezia in planning cost and making it easier to record journal and ledgers. The method used in application development uses the SDLC method with a Prototype model. The functionality contained in this application is planning the cost of regular and incentive tour packages, ordering packages and several accounting report. This application is built using the PHP programming language and Code Igniter Framework

Keywords: Planning, accounting report, Regular, Incentive
