

# **NEWDESIGN OF CHILDREN CENTER IN BUMI SERPONG DAMAI (BSD), TANGERANG SELATAN WITH ACTIVE LEARNING APPROACH**

**Amelya Rahmadani Putri**

## **ABSTRACT**

*Many Indonesian children do not discover their potential until the age of 12. Whereas children aged 0-5 years is a period of Golden Age or a period of child growth. Meanwhile, the number of facilities for child development centers in Tangerang City and South Tangerang as one of the big cities is still inadequate. Non-formal education that is packaged attractively in the form of edutainment can hone children's potential through soft skills and hard skills. This design uses qualitative research methods, resulting in the concept of "funtastic" which is a combination of fun and fantastic, so that children can learn but in a fun way and develop their imagination for creativity. With an active learning approach that leads to children's activities and behavior in the application of active and creative designs so that children can develop their potential and talents to the fullest. The results of this interior design have a cheerful and different thematic feel in each room following the unique character of children with high curiosity.*
