

ABSTRACT

Modern Islamic Boarding Schools or commonly called Islamic Boarding Schools are educational institutions that provide basic knowledge and religious values to guide students to become complete Muslim individuals both in thinking and behaving. Implementing a system of formal education and informal education in one environment within the scope of education. Such an education system can have an impact on improving the quality of student learning.

One of the boarding schools that provide facilities and curriculum as above is PSDI Islamic Boarding School. PSDI accommodates 105 students, by implementing a Boarding Day School learning system in which the majority of students are boarding and some are Fullday students. In designing the interior of the PSDI Boarding School, the PSDI High School identity approach is used which refers to the school's identity based on educational culture, student activities, symbols, vision and mission, and the PSDI Boarding School High School curriculum. In addition, the design is based on the design standards for boarding school that have been set by the Ministry of Education in 2007, precedent studies and comparative study results.

The design theme refers to the identity of the PSDI Islamic Boarding School which is in accordance with the vision, mission and goals of this school so that the interior design has the theme of Active Learning in Islamic School. The hope of this interior design is to create religious nuances, to create psychologically positive energy such as calm, tranquility and solemnity. In realizing an active education, namely by creating an interior space that can affect the development of students in creative expression and thinking.
