

ABSTRACT

This redesign was motivated by the psychological condition of students who were teenagers. Students with different psychological conditions spend a lot of time in Islamic boarding schools because they must live in Islamic boarding schools where many rules and activities must be followed. The concept of the Islamic boarding school, its interior design, and its facilities Mahsyar Nurul Iman Islamic boarding school are contrary to the characteristics of teenagers who dabble, fantasize, group activities, and feel anxiety and confusion. Through the approach of spatial psychology, the redesign at Al Mahsyar Nurul Iman Islamic Boarding School uses the concept of Creative and Relieved. This aims to create a calming, comfortable and safe environment for students who are experiencing cognitive development and changes in a psychological state so that students can feel at home and grow in studying in accordance with the vision, mission and curriculum that has been set by the Al Mahsyar Nurul Iman Islamic Boarding School Foundation. In addition, it can create a design that can represent Al Mahsyar Nurul Iman Islamic Boarding School.
