

ABSTRACT

LAZIS Syamsul 'Ulum is an Agency engaged in the field of fundraising zakat, infaq, and shadaqoh humanitarian fund. LAZIS Syamsul 'Ulum raises funds through some of the programs that infaq/shadaqoh, waqf, zakat and saving sacrifice. In addition to raising funds LAZIS Syamsul 'Ulum also has a special program one of them is Growing Program. The process of raising funds is generally done directly with donors to come to the office LAZIS Syamsul 'Ulum. In the recording LAZIS Syamsul 'Ulum still recording manually in Google Sheets that allows the redundant data and the data is not accurate. The process of accumulation that requires donors to come to the office LAZIS Syamsul 'Ulum can also be burdensome donors. Through applications built donors can do fundraising without having to come directly to the office, additionally, the built-in application can also facilitate the admin/staff in the management and recording of funds. The making of this application using the prototype method, by using the PHP programming Language and Database Management System MySQL. Application testing is performed using the method of Black Box Testing. Application testing is done using the Black Box Testing method. With the tests that have been carried out, the application is expected to be able to record the collection and reporting of Growing Program funds and the application can produce an Interpretation report.
