*The Office for the Protection of Food Crops and Horticulture (BTPPH) of West Java Province is a center under the auspices of the Department of Agriculture, having the main task of carrying out all Regional Government affairs in the field of food crop agriculture based on the principles of autonomy, deconcentration, and assistance tasks. Based on the Decree of the Minister of Agriculture Number 530/kpts/org/8/1978 dated August 24, 1978, this office was established in 1978 under the name 'Balai Protection of Food Crops IV'. Then there was a change in nomenclature through Governor Regulation Number 59 of 2014, where there was a change in name to the Center for the Protection of Food Crops and Horticulture of West Java Province.*

*The work space can be said to be effective if the work space is conducive and appropriate to its place and function. In addition, future work trends also need to be considered in planning the work space (Gustafsson, 2002). It would be nice if a designer pays attention to some of these trends to be implemented into office design, so that the designs created always have an innovation that can meet the needs of its users.*

**Keyword:** *Redesign, Interior, BTPPH Office of West Java Province, Human Behavior Approach*
