

ABSTRACT

Health is a very crucial thing in every human being. Be it physical, mental or spiritual. However, quite a lot of people who are not mentally healthy or experience mental health disorders, especially teenagers or aged 16 - 24 years are the subjects who experience the most mental health disorders. One of these mental health disorders is *Borderline Personality Disorder* or borderline personality disorder and what is even more concerning is that few people know about this disorder and many have a negative stigma about this mental health disorder. Even though this disorder can happen to anyone and can be fatal if we ignore it. This study aims to design an information media in the form of comics to increase public knowledge regarding *Borderline Personality Disorder*. The method used in this study is a qualitative method with data collection such as observations, interviews and literature study which will be analyzed by comparison matrix and qualitative descriptive methods. With the design of comic information media about *Borderline Personality Disorder* It is hoped that the public will know and understand and be able to understand and take appropriate action for the sufferer and the figures around the sufferer.
