

ABSTRACT

This final project discusses the 5C Cinematography technique in a short film entitled A glimmer of hope for the mother. The 5C Cinematography technique component consists of several important elements, namely *Composition*, *Close up*, *Camera Angle*, *Continuity*, *Cutting*. The five technical components of cinematography have been applied in the making of the short film, *Secercah Harapan Untuk Sang Ibu*. A glimpse of hope for the mother is a short film with a duration of 5-10 minutes, the film a glimpse of hope for the mother will tell of a child's dedication to his mother by realizing the mother's wish to go on pilgrimage. The 5C Cinematography technique is used to produce a more aesthetic film through the application of a calm atmosphere wrapped in bright lighting and yellow, green, and blue colors to make the film seem peaceful. The purpose of this final project is to present and project the visualization of the implementation process of the 5C cinematography technique in the short film, a glimmer of hope for the mother.
