ABSTRACT

PT. Tourezia Cakra Inspira is a company that provides services for event management. The company is located at Pogung Raya 27 B − D33 A. Sinduadi, Mlati, Sleman, D.I. Yogyakarta. The company's finance department, in making budget plans for events ordered by customers, is still manually using Microsoft Excel, so that calculation errors often occur and data is not stored permanently. This web-based application will assist the company's finance department in making event budget plans and event budget plan reports. This application is built using the PHP programming language method, the CI4 Framework, and the MySQL database to handle the problems that occur. The software development method in this final project uses the Software Development Life Cycle (SDLC), namely Prototype. Testing the application using the black box testing method. The application is able to store the data needed for budgeting and will generate a budget plan report based on customer order events.
