

ABSTRACT

All companies perform financially well in order to achieve the company's goals to maximize company profits. In an effort to achieve the company's goals, it is to increase Intellectual capital, Corporate Social Responsibility and Good Corporate Governance by using independent commissioners as proxies.

The purpose of this study was to determine the significant influence of Intellectual Capital, Corporate Social Responsibility and Good Corporate Governance on Financial Performance in telecommunication sub-sector companies listed on the Indonesia Stock Exchange in the 2016-2020 period with a sample of 10 companies.

The results of the study using panel data regression analysis using the E-views 12. The data collection method in this study uses secondary data sources in the form of annual financial reports of telecommunications sub-sector companies listed on the Indonesia Stock Exchange for the 2016-2020 period.

The results of the study reveal that simultaneously intellectual capital, corporate social responsibility and good corporate governance have an effect on financial performance. The results partially reveal that intellectual capital has a significant effect on financial performance, corporate social responsibility and good corporate governance have no significant effect on financial performance.
