

ABSTRACT

The Bandung Regency Culture and Tourism Office organizes the Facilitation of Creative Economy Human Resource Development activities or often referred to as training for the creative economy community. The Bandung Regency Culture and Tourism Office requires a design in the form of a certificate as a form of appreciation to resource persons and participants who take part in training activities for creative economy actors. The result of the design is a certificate containing all information regarding training activities, the certificate will be distributed to resource persons as performers in training activities and to participants who have participated in training activities. For this reason, the methodology used is a modified prototyping methodology with three stages, namely, Design Requirements Collection, Design, Review and Revision. In the process of making a certificate design, using Corel Draw software.
