

ABSTRACT

The potential of Depok City in the creative industry and the awareness that the creative industry requires innovation and quality human resources in each sub-sector of the creative industry, especially the sectors most in demand in Depok City, namely the Fashion sector, Craft Arts Sector and Product Design Sector, underlie Creative interior design. Hub in Depok City. The problems studied are the absence of facilities to accommodate creative industry players, interior problems regarding space privacy that affect the comfort and completeness of the facilities in the existing Creative Hub. The purpose of designing the Creative Hub is expected to be a forum for creative industry players to be able to see a wider range of creative industry sub-sectors and be able to know creative sub-sectors that have never been known before, as well as a forum for sharing and interacting with creative industry workers. Fasilitas utama pada Creative Hub ini berupa Creative Space, Coworking Space, dan Makerspace as place of collaboration between UMKM in Depok City and creative industry players in Depok City.

Keywords : Creative Hub, Coworking Space, Makerspace
