Environment and Forestry Riau Office is a Government Office that performs public duties and services in the field of environment and forestry. This office has made a strategic plan for the results to be achieved for five years from 2019 to 2024. Strategic plans have been structured as a picture of commitment to realize the performance of an appointative apparatus and institutional to the demands of public on transparent, easy, accountable and capable service to the community. To achieve the expected goals of employees prosecuted to work effectively in each implementation of work programs. Based on the results of direct observation at the Environment and Forestry Riau Office, there is still a constraint in the interior of the office. Improved employee performance can be influenced by many things, one of which is the interior design. The reference of the interior of the office interviewed to meet the standardization as the government's office and implementing the activity approach to be applied to the interior element to facilitate space users, support work productivity, and service to the public.

Keywords : *Re-design, Enviroment and Forestry Riau Office, Activity Approach.*
