

## ABSTRACT

Regional autonomy in principle is an increase in service to the community, community participation, and community welfare. Along with the increasing number of people and communities, government services must be adjusted to the needs. For this reason, local governments need facilities and infrastructure that are able to improve the implementation of regional autonomy, namely a representative office called the Regional Business Building.

Tangerang Regency Regional Business Building, located at Block AN 33, Jl. M. Atik Soeardia Blok AN 33 No.24, Kadu Agung, Kec. Tigaraksa Kab. Tangerang, Banten, is a building that houses regional service agencies which include agriculture & agriculture, fisheries & marine services, regional income offices, regional trade offices, cooperatives & SME offices, youth sports & culture offices. From some of the problems found in the Regional Business Building, the new design for the Tangerang Regency Regional Business Building is one of the best things to do as a reference to the regional government buildings, especially in Tangerang Regency.

The purpose of interior design for the Tangerang Regency Regional Business Building is a motivation and reference for the creation of a Government Building with facilities and infrastructure that are in accordance with office ergonomics standards in Indonesia and pay attention to the needs and activities of space users in order to create comfort in carrying out work. The interior design of the Tangerang Regency Regional Business Building uses the concept of Modern Simplicity, with the hope of creating a space atmosphere that prioritizes functions and needs that are in accordance with its users so as to create an increase in employee productivity at work.
