

PREFACE

Bismillahirrahmannirrahiim, in the name of Allah the most gracious and the most merciful.

It took me years to finally finish writing this final assignment as the last requirement to graduate for my bachelor's degree. The inspiration of this research was started from the previous research done in the same place, Bulog Subdivre Bandung. In that research, the writer focused only on purchasing process and using the combining SCOR approach and AHP as tool to descend KPIs based on their level of interest. From there, discussion after discussion my then writer's advisor gave an idea why not taking not only purchasing process but also distribution process and using combined SCOR and BSC approach for your focus research, thus the title of this research was formed "DESIGNING SUPPLY CHAIN PERFORMANCE MONITORING SYSTEM ON RICE PROCUREMENT AND DISTRIBUTION USING BSC-SCOR MODEL APPROACH FOR ENHANCING FOOD SECURITY".

In writing this final assignment, there are many parties participated during data collecting and processing, giving ideas on how to design the monitoring system dashboard, giving constructive suggestions and criticisms, or sending encouraging words to keep going. The writer could never make it here without the help and support from those parties involved. Therefore, the writer would humbly honoured the greatest gratitude and thanks towards :

1. Ibu and Bapak of the writer who always loved the writer to their fullest capacity they had. The writer completely understands that, if they had another chance and a better knowledge on how to love, they would've done that.
2. Mr. Ari Yanuar Ridwan S.T., M.T. and Mr. Dr. Mohammad Deni Akbar S.T., M. Mat., as the writer's advisors who patiently guides through helpful advises and suggestions.
3. The rest of the writer's family involved during writing this research who fully understand the obstacles that the writer endured during the process this research.

4. Bulog Subdivre Bandung which had been so helpful in providing necessary data in this research.
5. Aulia, Shahara, Dwi, Natalia, Fiyanika, Nihan, and Azlia who accompanied and encouraged the writer through the hardships, and who never stop believing and supporting the writer finishing this research.
6. Classmates of TI-39-01 and TI-39-02 who gave the writer inspirations and supports to keep going.

The writer is fully aware that there may be some mishaps every here and there, the writer hopes that this research is able to deliver many benefits to its reader whether general public or peer academics, Bulog Subdivre Bandung as the object in this research, Industrial Engineering Major of Telkom University, and other readers who are considering to take further research.
