PT. Marga Trans Nusantara is a company engaged in the planning, operation, maintenance, and procurement of toll roads appointed by the government as a toll road company under the supervision of Jasa Marga with 50 employees working in it. The activities that occur at the Marga Trans Nusantara office are the work activity flow processes of employees, starting from creating documents, printing documents until the document is stored, it is necessary to pay attention to the placement of equipment so that the work activity flow process of employees can run smoothly and well. A good office interior design from all aspects of its interior elements will create comfort and be able to increase employee productivity as the needs of every office or company, including the PT. Trans Nusantara clan. Based on this, a redesign or re-design needs to be carried out at the Graha MTN office in order to create a comfortable workspace and increase the work productivity of office space users in carrying out activities through the facilities provided in accordance with the activities carried out. The realization of facilities based on activities and the application of the concept of space that is able to have an impact on the smooth running of employee activities is one solution that can be used in the design.
