

ABSTRACT

This Final Project is entitled "Self-doubt as an Idea for the Creation of Paintings". This final project focuses on addressing the issue of self-doubt. This work is a form of 2D painting that features neo-expressionism and is created using various techniques, such as mixed media and painting. Confidence is needed in the environment and work. This work deals with the events that the author himself experienced, self-doubt. If you have the creativity and talent to major in the arts, especially you who mean it and a student majoring in painting, this lack of self-doubt is very disturbing and can also hinder the expression of the author's work. Self-doubt also interferes with other aspects, such as how to dress and adaptation to the environment. Self-confidence is no longer a personal opinion, but is judged by the results of other people's assessments, so that each individual is not confident with things that make themselves comfortable. The purpose of this final project is to create a final project with the concept of self-doubt and find what is behind the author to visualize the concepts and ideas in 2D painting. Author is also influenced by other artists who become references. Evgeniy Nesterov, who raises the same issue and Jean-Michel Basquiat, who uses the same technique and style as the author. This artwork is message about the reality of life that self-confidence are in every human being.

Keywords: self-doubt, neo-expressionism, mixed media.
