

TABLE OF FIGURE

Figure 1. Motor vehicle's group in toll road	6
Figure 2. One and two object detection	8
Figure 3. How YOLO works	9
Figure 4. System Flow Chart (Classification)	11
Figure 5. Image before resizing	12
Figure 6. Image after resizing	12
Figure 7. Training Set	13
Figure 8. Validation Set	13
Figure 9. Testing Set	14
Figure 10. Configuration file	15
Figure 11. Training Process Output	15
Figure 12. Comparisons between weight files	16
Figure 13. Weight file at 3290 iterations	16
Figure 14. Weight file at 1400 iterations	17
Figure 15. Weight file at 3000 iterations	18
Figure 16. Web Scraping Flow Chart	19
Figure 17. Search Images on Google Images	20
Figure 18. Part of the script to collect the URLs	20
Figure 19. URLs of "3 axle truck" keyword search result	21
Figure 20. URLs of "4 axle truck" keyword search result	21
Figure 21. URLs of "5 axle truck" keyword search result	22
Figure 22. Requesting to Images' Source	22
Figure 23. If OpenCV can not load the image	23
Figure 24. Output shows that images are being downloaded	23
Figure 25. Output shows that images are being deleted	24
Figure 26. Images that managed to be downloaded	24
Figure 27. Generate_train.py file	26
Figure 28. Generate_test.py file	26
Figure 29. Obj.names file	27
Figure 30. Obj.data file	27
Figure 31. YOLOv4 configuration file	27
