

LIST OF FIGURES

2.1	The illustration of semi-supervised medical image segmentation	11
2.2	Example of brain visualization using multiple image modalities	12
2.3	The illustration of cross-modality medical image segmentation	13
2.4	The comparison of two predicted segmentation masks from their metric results.	15
3.1	Main flowchart of the proposed method	16
3.2	Brief Comparison between previous method (TD-SS-Seg) and proposed method (Cross Modality TD-SS-Seg) in terms of their input data, segmentation model and training phases.	17
3.3	The illustration of the data preparation process.	18
3.4	The original NIFTI Images opened with Mango application.	19
3.5	The information extracted from 3D NIFTI Images.	19
3.6	Intensity histogram before and after being applied with outlier handling (2nd and 98th percentile range).	20
3.7	Intensity histogram before and after normalization.	21
3.8	Sample image before and after rescaling process.	22
3.9	Sample image before and after resizing process.	22
3.10	Bar plot intensity comparison between pre-resized image and resize image. .	23
3.11	The illustration of concatenation process.	23
3.12	The illustration of batching process.	24
3.13	The process of task driven semi supervised augmentation	25
3.14	The architecture of UNet Segmentation Model	28
3.15	The architecture of Generator Model	28
3.16	The architecture of Discriminator Model	29
3.17	The process of first phase training	29
3.18	The process of second phase training	30
3.19	The process of third phase training	31
3.20	The process of alignment model training	32
3.21	The result of alignment model. (a) Real CT image, (b) Real MRI image, (c) Fake CT image, (d) Fake MRI image	33
3.22	The illustration of ensemble technique for evaluating two models result . . .	37
3.23	The process of data testing process	38
3.24	Boxplot of Image Modality Pixels Distribution	39
4.1	Visualization of qualitative measurement	46
A.1	Sample images and unique label distribution in each slice of Image CT001 .	59
A.2	Sample images and unique label distribution in each slice of Image CT002 .	59

A.3	Sample images and unique label distribution in each slice of Image CT003	60
A.4	Sample images and unique label distribution in each slice of Image CT004	60
A.5	Sample images and unique label distribution in each slice of Image CT005	61
A.6	Sample images and unique label distribution in each slice of Image CT006	61
A.7	Sample images and unique label distribution in each slice of Image CT007	62
A.8	Sample images and unique label distribution in each slice of Image CT008	62
A.9	Sample images and unique label distribution in each slice of Image CT009	63
A.10	Sample images and unique label distribution in each slice of Image CT010	63
A.11	Sample images and unique label distribution in each slice of Image CT011	64
A.12	Sample images and unique label distribution in each slice of Image CT012	64
A.13	Sample images and unique label distribution in each slice of Image CT013	65
A.14	Sample images and unique label distribution in each slice of Image CT014	65
A.15	Sample images and unique label distribution in each slice of Image CT015	66
A.16	Sample images and unique label distribution in each slice of Image CT016	66
A.17	Sample images and unique label distribution in each slice of Image CT017	67
A.18	Sample images and unique label distribution in each slice of Image CT018	67
A.19	Sample images and unique label distribution in each slice of Image CT019	68
A.20	Sample images and unique label distribution in each slice of Image CT020	68
A.21	Sample images and unique label distribution in each slice of Image MRI001	69
A.22	Sample images and unique label distribution in each slice of Image MRI002	69
A.23	Sample images and unique label distribution in each slice of Image MRI003	70
A.24	Sample images and unique label distribution in each slice of Image MRI004	70
A.25	Sample images and unique label distribution in each slice of Image MRI005	71
A.26	Sample images and unique label distribution in each slice of Image MRI006	71
A.27	Sample images and unique label distribution in each slice of Image MRI007	72
A.28	Sample images and unique label distribution in each slice of Image MRI008	72
A.29	Sample images and unique label distribution in each slice of Image MRI009	73
A.30	Sample images and unique label distribution in each slice of Image MRI010	73
A.31	Sample images and unique label distribution in each slice of Image MRI011	74
A.32	Sample images and unique label distribution in each slice of Image MRI012	74
A.33	Sample images and unique label distribution in each slice of Image MRI013	75
A.34	Sample images and unique label distribution in each slice of Image MRI014	75
A.35	Sample images and unique label distribution in each slice of Image MRI015	76
A.36	Sample images and unique label distribution in each slice of Image MRI016	76
A.37	Sample images and unique label distribution in each slice of Image MRI017	77
A.38	Sample images and unique label distribution in each slice of Image MRI018	77
A.39	Sample images and unique label distribution in each slice of Image MRI019	78
A.40	Sample images and unique label distribution in each slice of Image MRI020	78
