

## LIST OF FIGURES

Figure 1.1 Schematic of Research Method .....	4
Figure 2.1 Drip Emitter .....	8
Figure 2.2 IoT Working Schema.....	10
Figure 2.3 Wi-Fi Module NodeMCU ESP 8266.....	12
Figure 2.4 Arduino Mega 2560.....	13
Figure 2.5 DHT22 Sensor Module.....	13
Figure 2.6 Capture Statistics on Wireshark.....	16
Figure 3.1 Drip Irrigation model realization .....	18
Figure 3.2 Block Diagram of IoT based Drip Irrigation .....	21
Figure 3.3 Firebase and NodeMCU Connection Flowchart.....	22
Figure 3.4 Firebase and Application Connection Flowchart .....	23
Figure 3.5 DHT22 Circuit.....	24
Figure 3.6 NodeMCU and Arduino I2C communication circuit .....	25
Figure 3.7 Communication between NodeMCU and Database.....	26
Figure 3.8 Firebase Main Page.....	27
Figure 3.9 Creating a New Database.....	27
Figure 3.10 Project Summary page.....	27
Figure 3.11 Page View To Create Database .....	28
Figure 3.12 Realtime Database Page .....	28
Figure 3.13 Firebase Host ESP8266 .....	29
Figure 3.14 Firebase Token Replenishment Page.....	29
Figure 3.15 Service Account Page .....	29
Figure 3.16 Inserting Firebase Token on Firebase Auth ESP8266.....	30
Figure 3.17 Real Time Database .....	30
Figure 3.18 Monitoring Layout.....	31
Figure 3.19 Controlling Layout.....	32
Figure 3.20 Example of Capture Statistics on Wireshark .....	33
Figure 4.1 Application of Drip Irrigation on Plants.....	34
Figure 4.2 Primary Selenoid in each Planting Medium .....	35
Figure 4.3 Pump and Water Tank Implementation .....	35
Figure 4.4 Housing.....	35
Figure 4.5 Low indicator on the app and step on the sensor.....	36
Figure 4.6 Example of Watering Control Test Results .....	39

Figure 4.7 Temperature Value comparison chart.....	43
Figure 4.8 Delay measurement chart at 0 meters .....	45
Figure 4.9 Delay measurement chart at 5 meters .....	45
Figure 4.10 Delay measurement chart at 10 meters .....	45
Figure 4.11 Delay measurement chart at 15 meters .....	46
Figure 4.12 Average Total Delay.....	46
Figure 4.13 Average Throughput per Session.....	47
