

LIST OF TABLES

Table I. 1 Production Development, Harvested Area and Productivity of Sorghum in East Java.....	2
Table I. 2 Alternative Solution.....	7
Table II. 1 Classification of Workload and Physiological Reactions	13
Table II. 2 Selection of Standard Design Framework.....	21
Table III. 1 Primary Data Collection	25
Table III. 2 Primary Data Collection	26
Table III. 3 Integrated Information System	29
Table IV. 1 Worker Anthropometric Data	31
Table IV. 2 Initial Worker Shovel Dimension Before Designing.....	31
Table IV. 3 Reba Analysis Before Redesign (Worker 1)	33
Table IV. 4 Reba Analysis Before Redesign (Worker 2)	33
Table IV. 5 Reba Analysis Before Redesign (Worker 3)	34
Table IV. 6 Pulse Data and Load per Hour.....	35
Table IV. 7 Worker's Energy Expended.....	36
Table IV. 8 Worker's Productivity	36
Table IV. 9 Calculation of the Average of Each Dimension	37
Table IV. 10 The Dimension of Popularly Agricultural Hand Tools in East Java	37
Table IV. 11 Explanation of Figure VI.4	39
Table IV. 12 Determining the Specification	41
Table IV. 13 Importance Rating	42
Table IV. 14 Alternative Selection	48
Table IV. 15 Design Alternatives	49
Table IV. 16 5 Pont Scale Description.....	50
Table IV. 17 Calculation of Utility Value.....	53
Table IV. 18 Component Function Comparison.....	54
Table V. 1 Verification	56
Table V. 2 Reba Analysis After Redesign (Worker 1)	58
Table V. 3 Reba Analysis After Redesign (Worker2)	58
Table V. 4 Reba Analysis After Redesign (Worker 3)	59

Table V. 5 Work Physiology Analysis After Redesign	60
Table V. 6 Workload Clarification	60
Table V. 7 Worker's Energy Expended	60
Table V. 8 Worker's Productivity	60
Table V. 9 Comparison of Worker's Productivity	61
