

ABSTRACT

NEW DESIGN OF KOLABORATO COWORKING SPACE WITH A BEHAVIOUR APPROACH

Abstract – Coworking space provides business people with a flexible work environment where they can interact with each other. Working in a Co-working space allows people to meet and discuss ideas with colleagues, share conference materials, and exchange ideas. These spaces are also used as a place for communities that do not have permanent gathering places. This collaboration helps businesses brainstorm and share new ideas. In KOLABORATO, problems were found in space organization, problems in facilities, and acoustic problems. To overcome these problems a new design is needed because the existing building area is not sufficient for the required space. The theme of this design is "Creative Collaborations" and the concept of this design is "Smart Office Environment". The purpose of this design is to design interiors with a behavioral approach in accordance with the vision and mission of KOLABORATO, namely to accommodate communities, freelancers and startups as well as adding good facilities and infrastructure and good spatial organization.
