

PREFACE

Alhamdulillahirobbil ‘alamin, this undergraduate thesis, **IMPLEMENTATION AND ANALYSIS OF NETWORK SECURITY IN RASPBERRY PI AGAISNT DOS ATTACK WITH HIPS SNORT**, is only possible because of the Almighty Allah SWT’s incredibly generous mercy and grace. This undergraduate thesis is being presented in order to satisfy one of the criteria for earning the Bachelor of Science in Telecommunication Engineering.

My first supervisor, Dr. Nyoman Bogi Aditya Karna, S.T., MSEE, and my second supervisor, Arif Indra Irawan, S.T., M.T., deserve special thanks for their invaluable guidance and inspiration in helping me finish this bachelor thesis. Last but not least, I would like to dedicate the utmost respect and gratitude to my cherished parents, family, and closest friends. Without a doubt, all I need in life—loves, concerns, spirits, inspiration, patience, desire to wait for my graduation, and enduring prayers throughout the day and night are everything.
