

## LIST OF TABLES

2.1	Stabilizers and logical operators for 5-qubit $[[5, 1, 3]]$ codes. . . . .	11
2.2	Stabilizers and logical operators for 7-qubit $[[7, 1, 3]]$ quantum codes.	12
2.3	Three-qubit syndrome. . . . .	14
3.1	The stabilizers of the proposed $[[5, 1, 3]]$ quantum perfect codes and their logical operators $\bar{X}$ and $\bar{Z}$ . . . . .	19
3.2	The stabilizers of the proposed quantum $[[12, 2, 4]]$ accumulate codes and their logical operators $\bar{X}$ and $\bar{Z}$ . . . . .	25
4.1	The syndrome when no qubit error occurs during transmission. . . . .	29
4.2	The syndrome when single qubit error occurs during transmission. . . . .	30
4.3	The syndrome when two qubit error of X and X occurs transmission. . . . .	32
4.4	The syndrome when two qubit error of X and Y occurs during transmission. . . . .	34
4.5	The syndrome when two qubit error of X and Z occurs during transmission. . . . .	36
4.6	The syndrome when two qubit error of Y and Y occurs during transmission. . . . .	38
4.7	The syndrome when two qubit error of Y and X occurs during transmission. . . . .	40
4.8	The syndrome when two qubit error of Y and Z occurs during transmission. . . . .	42
4.9	The syndrome when two qubit error of Z and Z occurs during transmission. . . . .	44
4.10	The syndrome when two qubit error of Z and X occurs during transmission. . . . .	46
4.11	The syndrome when two qubit error of Z and Y occurs during transmission. . . . .	48

## ACHIEVEMENT

1. K. Anwar, and M. Ramadhan, "The Smallest Perfect Quantum Accumulate Codes," accepted in *IEEE Conference, Asia Pasific Conference on Communications (APCC), Kuala Lumpur, Malaysia, July 2021*.
2. K. Anwar, and M. Ramadhan, A. Trisetyarso "Short Quantum Accumulate Codes with High Rate and Multiple Error Corrections Capability," accepted in *IEEE Conference, Symposium on Future Telecommunication Technologies (SOFTT), Bandung, Indonesia, December 2021*.
