

ABSTRACT

Nyetakin is an application engaged in digital printing services. In the past, if you wanted to print, the customer had to go to the printing house. As for other obstacles such as long queues and take a long time, price and quality comparisons with other stores and so on. With the Nyetakin application as a printing service provider with customers in printing without having to come to the printing house. Nyetakin also provides couriers to deliver customer orders. The Nyetakin application already has a website at <http://nyetakin.com//>. Nyetakin is a startup assisted by StartupHub in the Spirit Of Entrepreneur Lab at Telkom University. make it easier for customers because there are delivery services (couriers) and design services for
