

ABSTRAK

The School of Nature in its approach is a form of the concept of education, which was originally based on Lendo Novo. Lendo Novo puts his concern about the cost of education which from time to time is increasingly unaffordable to the public at large. The idea of building a natural school is based on education so that it can be reached by all humans, the School of Nature is a form of alternative education about the school system with the concept of universe-based education. Natural schools are schools with the concept of universe-based education that uses natural resources in the surrounding environment .The natural school conceptualizes that students play while learning and children close to nature. The creativa school in Bandung. In the natural school in the School of Nature can attract students and be able to provide new innovations in the field of education. The concept of Nature School applied to the school area makes all activities carried out relate to nature so that in everyday life students will interact with nature, therefore tropical concepts are needed in the design of school interiors so that the children can learn and explore interacting with the natural environment. The selection of this concept aims to make students better understand and understand how to maintain, maintain and care for nature well.
