ABSTRACT

In the development of technology and information science to date the management processapprentice participant data still uses a manual system such as Google Form, both inidentity and competency data collection. Of course, the organizers are having a hard timein managing participant certification data, a system is needed to helpmake it easier for companies to manage the data through the TransTRACK-Certificate web.In addition, there is no security certificate yet, so you can make transactions orduplicated by students, then security is made with a verification process foruser. Keywords : Web, Transtrack certificate.
