| APPROVAL PAGE .....  | i   |
| ORIGINALITY STATEMENT .....                                      | ii  |
| ABSTRACT .....   | iii |
| GRATITUDE NOTE .....   | iv  |
| AUTHOR'S FOREWORD .....  | v   |
| LIST OF CONTENTS .....   | vi  |
| LIST OF FIGURES.....   | ix  |
| LIST OF TABLES .....   | xi  |
| CHAPTER 1 INTRODUCTION .....                                     | 1   |
| 1.1.    Background.....  | 1   |
| 1.2.    Problem Formulation.....                                 | 2   |
| 1.3.    Objectives .....   | 2   |
| 1.4.    Scope of Works .....                                     | 3   |
| 1.5.    Research Methods .....                                   | 3   |
| 1.6.    Bachelor Thesis Organization .....                       | 4   |
| CHAPTER 2 BASIC CONCEPT.....                                     | 6   |
| 2.1.    Automatic Dependent Surveillance Broadcast (ADS-B) ..... | 6   |
| 2.2.    Antenna.....   | 7   |
| 2.3.    Antenna Microstrip.....                                  | 7   |
| 2.3.1.    Patch Materials Formula and Ground Plane Formula ..... | 8   |
| 2.4.    Antenna Multiband.....                                   | 9   |
| 2.5.    Antenna Parameters.....                                  | 9   |
| 2.5.1.    Impedance .....  | 9   |
| 2.5.2.    Return loss.....                                       | 10  |
| 2.5.3.    VSWR .....   | 10  |
| 2.5.4.    Radiation Pattern.....                                 | 10  |
| 2.5.5.    Polarization .....                                     | 11  |
| 2.5.6.    Gain .....   | 11  |
| 2.6.    S-Band Frequency .....                                   | 11  |
| 2.7.    CubeSat.....   | 12  |

|   |    |
|---|----|
| CHAPTER 3 SYSTEM DESIGN AND SIMULATION.....   | 14 |
| 3.1.    System Design .....   | 14 |
| 3.2.    Flow Diagram Design.....  | 14 |
| 3.2.1.    Planning stage .....  | 15 |
| 3.3.    Antenna Specifications .....  | 16 |
| 3.3.1.    Selection of Substrate, Ground plane and Patch Materials .....              | 16 |
| 3.4.    Method on Antenna .....   | 17 |
| 3.4.1.    Coaxial Port.....   | 18 |
| 3.4.2.    Slot .....  | 18 |
| 3.4.3.    Substrate Dual Layer .....  | 18 |
| 3.4.3.    Antenna Design and Simulation.....  | 18 |
| 3.5.    Antenna Design Simulation Results.....  | 19 |
| 3.5.1.    Return Loss .....   | 19 |
| 3.5.2.    VSWR .....  | 20 |
| 3.5.3.    Gain and Pola radiation.....  | 21 |
| 3.5.4.    Axial ratio.....  | 22 |
| CHAPTER 4 RESULTS AND ANALYSIS.....   | 24 |
| 4.1.    Introduction .....  | 24 |
| 4.2.    Antenna Fabrication and Measurement.....                                      | 25 |
| 4.2.1.    Returnloss.....   | 25 |
| 4.2.2.    VSWR .....  | 26 |
| 4.2.3.    Gain, Pola radiation, and Axial Ration .....                                | 28 |
| 4.3.    Analysis of Simulation Results with Measurement Results.....                  | 29 |
| 4.3.1.    Return Loss Comparison.....   | 30 |
| 4.3.2.    Comparison of VSWR .....  | 31 |
| 4.3.3.    Comparison Gain and Pola radiation .....                                    | 32 |
| 4.4.    Comparative Analysis of Optimized Measurement and Simulation<br>Results ..... | 35 |
| 4.4.1.    Comparison of Return Loss .....   | 35 |
| 4.4.2.    Comparison of VSWR .....  | 36 |
| 4.4.3.    Comparison of Gain and Pola radiation .....                                 | 37 |

|  |    |
|--|----|
| 4.4.4.    Polarization Comparison.....                     | 39 |
| 4.5.    Conclusion Antenna Analysis .....                  | 40 |
| 4.6.    The Test Receives an ADS-B Signal.....             | 41 |
| CHAPTER 5 CONCLUSIONS AND SUGGESTIONS.....                 | 42 |
| 5.1.    Conclusions .....                                  | 42 |
| 5.2.    Suggestions.....                                   | 42 |
| BIBLIOGRAPHY .....   | 43 |
| ATTACHMENT .....   | 44 |
| 1.    Antenna Installation on the 3U CubeSat Platform..... | 44 |
| 2.    ADS-B Testing Using the flightradar Application..... | 45 |
