

ABSTRACT

In order to support aspects of professional expertise, the Faculty of Applied Sciences, Telkom University has provided complete educational support facilities and infrastructure, but theoretically supporting facilities and infrastructure for aspects of professional expertise. In the world of work, integration will be needed between theoretical knowledge that has been obtained from lectures and apprenticeships to provide an overview of the real world of work.

The internship was carried out at PT Bejana Investidata Globalindo, which is a company engaged in the field of information technology which is considered successful in surviving amidst increasingly intense market competition. During the internship, the author played the role of Product Owner in one of the WWC projects. The background for the WWC application is due to the need to facilitate efficient and effective meetings and conferences, without having to experience geographical constraints and high costs. Prior to the existence of the WWC application, conferences or business meetings were generally held physically, which required a large amount of time and costs, both for organizers and participants. Therefore, the purpose of WWC application development.

Keywords: Product Owner, conference
