

ABSTRACT

Internship is one of the higher education programs that aims to be a place for students to develop their talents and interests by practicing directly in the world of work. This Faculty Internship is carried out in collaboration between the Faculty of Applied Sciences, Telkom University and PT Informatics Data Tables. The purpose of this Faculty Internship is to develop the ability of students / I. The Faculty Intern program activities were carried out at PT Table Data Informatics, where in this internship I was entrusted to be the Business Analyst Team. In this internship activity, students/I conduct business analysis that focuses on developing the DKI JAKARTA Provincial Government's SIPD Application (Regional Financial Management Information System). This development aims to improve the appearance and business flow to make it more attractive and in accordance with user needs.

Keywords: Internship, PT Informatics Data Table, Business Analyst, DKI Jakarta Provincial Government's Regional Financial Management Information System (SIPD) application.
