Bandung Public Library is one of the public facilities provided by the government to the citizens of Bandung City as a means of education and entertainment. The strategic location of the library in the center of Bandung City can be a public facility that can become an education center in the city of Bandung. But in fact, Bandung City Public Library still does not meet the needs of its users related to the changing era of digitalization and the generation of digital natives. To answer this, it is necessary to create a new interior design for the Bandung City Public Library, with the aim of creating a Bandung City Public Library that is in accordance with the changes in the digital era in library implementation through the Learning Commons approach that the Bandung City Public Library can arouse interest in visiting and make the atmosphere of the Bandung City Public Library room comfortable and not boring. Methodology in interior design of Bandung City Public Library through data collection, observation, interviews, literature studies, programming, themes and concepts and final results in the form of design results.
