Bandung is one of the cities that has a variety of arts and culture in it. Among the many art contexts in Bandung, one of the largest is theater performance art. Based on data from the art scene of the Dinas Budaya dan Pariwisata Kota Bandung, there are more than 40 theater art communities, especially modern theater art, located in the city of Bandung and are still active today. Unfortunately, these communities lack facilities to support their activities both in terms of training and performances. Although Bandung already has several performance buildings, the existing facilities in these buildings are considered less qualified, especially the appearance of the building which is not suitable to be said to be modern. Therefore, the design of a modern theater performance building in Bandung is made on the basis of the community's need for qualified facilities, especially in terms of the interior of the building. In addition to this basis, the design of the building which will be made with a modern look can also be used as a reason to attract tourists to come to Bandung and watch performances.
