The development of the times that occurred has been increasingly modern, especially in activities to facilities and infrastructure in the Library, especially the Collage Library. Likewise, the challenge that must be faced by the Library at the Assosiation Islam University of Bandung is how the Library continues to apply systems and rules based on Islamic rules in this modern era. In Addition to the application of rules based on Islam, The University Library must also able to provide the main facilities in accordance with needs of uses in the library., one of which is a facility that adapts to the time. From the above explanation, the purpose of this design is to present a modern interior atmosphere while still applying the foundation of Islamic rules. With a qualitative data collection method that uses an activity approach to produce a the design theme, namely “Energetic Adaprive Library and a modern enrichment concept so as to provide comfort in the Library in accordance with the activities and identity of the Islamic College Library.
