

Abstract

This research aims to conduct a search and comparison of Isim Ma'rifat (definite nouns) with the removal of diacritics in the Quran and Tirmidzi Hadith. The method used involves a tokenizer and a diacritic remover tool to identify Isim Ma'rifat with the prefix "ال" (Alif Lam). The results of this study found 461 Isim Ma'rifat marked with Alif Lam (28%) out of 1634 Isim identified, some of which are also present in the Tirmidzi Hadith. This research provides valuable insights into the use of Isim Ma'rifat in religious texts and its relevance in the Arabic language. The findings of this research can serve as a basis for further studies and a deeper understanding of the linguistic and contextual aspects of the Quran and Tirmidzi Hadith.
