ABSTRACT

Making web-based applications for PT. RAPP is a project that aims to meet the needs of companies in increasing business efficiency and productivity. This project involves the stages of determining requirements, application design, and overall application development. The application created will have an easy-to-use user interface and be integrated with existing databases. The main objective of this project is to increase operational efficiency and provide the right solution to overcome the problem of selecting the nearest truck and recording the time in a particular activity.
