

ABSTRACT

This research is motivated by the phenomenon childfree among students and female students in the city of Bandung. From this phenomenon there is a problem, namely desire childfree still negative. The reason for this research is because childfree still considered not an option. Meanwhile in Oxford dictionary, childfree is a condition of not having children by choice (Widyasari and Hidayat, 2022). The purpose of this study is to understand the views of students and female students in the Bandung city area regarding the phenomenon childfree, as well as understand the directing of documentaries that raise phenomena childfree. The method used in this study is qualitative, because it uses interviews, observation, questionnaires, and literature. From this phenomenon, the author wants to provide various perspectives on the phenomenon childfree through documentaries. By taking several respondents who have filled out the questionnaire to serve as resource persons. Then interviews were conducted with the informants and briefing before taking pictures. Then the picture was taken with the resource persons. And closed by stitching the video produced into a documentary.

Keywords: *Documentary film, childfree, and student*
