

ABSTRACT

Alquran is the holy book of Muslims, Alquran itself consists of a total of 114 letters, 6236 verses and 18,994 unique words. Based on a report by The Royal Islamic Strategic Center (RISCC) titled The Muslim 500, in 2022 edition, Indonesia is a predominantly Muslim country. This makes Alquran a familiar thing in the life of Indonesian society. As a Muslim, to be able to understand Alquran is something that must be learned in order to become a good Muslim. Therefore, understanding every word in Alquran is also important because in every word that is in it has a different meaning. The Quran Vocabulary application is an Android application that has a feature of working on questions consisting of multiple choice and word entries to train memory. The progress of study and practice that has been completed can be monitored by the user and the data will automatically be stored on the device. Hence this application can help Indonesian people understand 50% of the contents of Alquran.
