

FOREWORD

Dear Readers,

We humbly present a thesis book entitled "Design of QUALITY OF SERVICE OPENWIFI IN TELECOM INFRA PROJECT LAB TELKOM UNIVERSITY". This book is the result of our research and exploration journey in the field of Telecommunication Transmission. Through this page, we would like to share the knowledge and findings that we have gained during the process of writing this thesis.

We would like to thank all those who have contributed and supported in the completion of this thesis book. Thanks also to our supervisors, DHONI PUTRA SETIAWAN, S.T., M.T., Ph.D. and PRANANTO BAYU HERLAMBANG, S.Kom, for their valuable guidance, advice, and direction. You have provided deep insights and helped us develop our understanding in the field of Telecommunication Transmission.

We would also like to express our deep appreciation to the Telecom Infra Project Lab staff who contributed their data and time to our research. Their support was invaluable in gathering information and producing a more comprehensive analysis.

In writing this thesis book, we also rely on contributions from libraries and research institutions that have provided references and literature that are useful in developing our research.

Although this book is limited in scope and coverage, we hope that the results of this research can make a positive contribution to the development of science in the field of Telecommunication Transmission. We realize that this book may not cover all aspects, and we hope that this book will be a start for further, more in-depth research in the future.

Thank you for your attention and the time you have taken to read this brief preface. Happy reading and hopefully the knowledge contained in this book can benefit us all.

Sincerely,

Gangan Hamamminata Jamalullail, Harod Joseph Almanro, and
Alif Anandhito Bagoes Rekotomo
