

ACKNOWLEDGMENTS

We would like to thank all those who have contributed and supported the completion of this thesis book. Without their help, this book would not have been realized.

Thank you to our supervisors, DHONI PUTRA SETIAWAN, S.T., M.T., Ph.D. and PRANANTO BAYU HERLAMBANG, S.Kom, for their valuable guidance, advice, and direction. You have provided deep insights and helped us develop our understanding in the field of Telecommunication Transmission.

We would also like to thank our family and friends who have provided moral support and motivation throughout this journey. Their words of encouragement and trust have been a source of inspiration for us to keep moving forward.

Thank you to all our respondents and research participants, especially to the Telecom Infra Project Lab staff who took the time to provide valuable data for our research. Their contributions form an important basis for the analysis and conclusions we present in this book.

In addition, thanks to the libraries and research institutions that have provided the resources we needed in the preparation of this thesis book. The availability of literature and access to information has enriched the content of our research.

We would also like to thank all those who cannot be mentioned one by one, but have provided support in any form during our journey to complete this thesis book.

Finally, we hope that this thesis book can make a meaningful contribution in the field of Telecommunication Transmission and become a useful reference for readers who are interested in the same topic. We realize that this book is not perfect, therefore, any constructive input, criticism, and suggestions are greatly appreciated for future improvements.

Sincerely,

Gangan Hamamminata Jamalullail, Harod Joseph Almanro, and
Alif Anandhito Bagoes Rekotomo
